

Ahmadinejad Says Israel Won't Survive

Obama Says He Would Meet With Him Personally

Iranian President Mahmoud Ahmadinejad lashed out at Israel recently, saying the Jewish state would not survive.¹

The Iranian president repeated his previous anti-Israel comments, calling the Holocaust by Nazi Germany during World War II a fabrication and saying that Israel is perpetrating a holocaust on the Palestinian people.²

Barack Obama? He says he's willing to meet with Ahmadinejad without any preconditions.

Ahmadinejad said, in 2005, that he believed Israel should be "wiped off the map"³ and later called the Holocaust "a myth."⁴ Most recently, he described the Jewish state as a "germ of corruption" that will be "removed soon."⁵

Obama? He called Iran a "tiny" country that doesn't "pose a serious threat to us the way the Soviet Union

posed a threat to us."⁶ And Sen. Obama is opposed to critical legislation labeling Iran's Revolutionary Guard a terrorist organization.⁷

Should we be surprised about Obama's positions? Obama surrounds himself with anti-Israel advisors like General Tony McPeak, Zbigniew Brzezinski and Robert Malley. And his spiritual mentor was anti-American, anti-Semite Rev. Jeremiah Wright.⁸

Barack Obama has not shown the wisdom, experience or strength to stand up to the radicals who would do us harm.

Concerned About Barack Obama? You should be.
